BREATHE

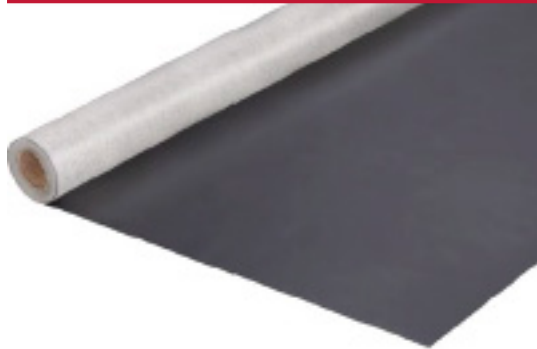

BLOCK

Flame retardant breather membranes & VCLs

FLAMEOUT® BREATHE

House wrap breather membranes for all pitched roofs and walls

The FlameOut Breathe membrane is engineered with superior flame retardant properties. It has excellent water vapour resistance and breathability. SAFE ONE is the only Euroclass A2 (noncombustible) breather membrane in the UK.

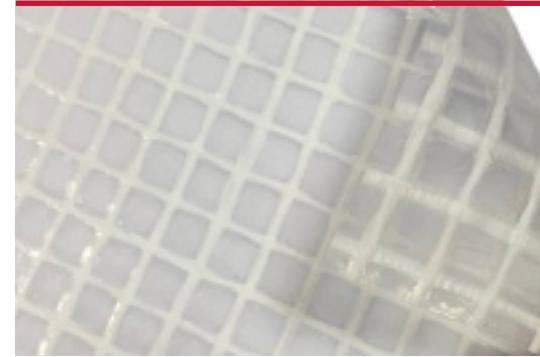

- CE approved
- Exceptional W1 water resistance
- High tensile strength and nail tear resistance
- Independently tested to EN 13501-1
- Safe One has long-term UV resistance for use with partially open facades (up to 50 mm gap)

	Weight	Colour	Flame retardant	Water tightness	Standard sizes
Safe One®	310gsm	Black / Silver	Class A2-s1,d0	W1	2.65 x 20m
FlameOut Breathe	90gsm	Dark Grey	Class B-s1,d0	W1	1.5 x 50m 3.0 x 50m

FLAMEOUT® BLOCK

Flame retardant vapour control layers for wall and roof installations

Reinforced polyolefin sheeting, engineered with superior flame retardant properties. Vapour control layers prevent moisture within the building's warm air from reaching the insulation layer and forming interstitial condensation.

- CE approved
- Excellent water vapour resistance
- High tensile strength
- Good nail tear resistance
- Acts as an air barrier for controlling ventilation
- Independently tested to EN 13501-1

FLAMEOUT	Weight	Flame retardant	Water vapour resistance	Water tightness
Block Plus	210gsm	Class B-s1,d0	300 MNs/g	2.0 x 50m
Block	140gsm	Class B-s1,d0	140 MNs/g	2.0 x 50m
Block Class A	155gsm	A2-s1,d0	20,000 MNs/g	1.5 x 50m
